Coromatic and Green Mountain sign strategic partnership agreement for data centers

Coromatic, part of the E.ON group and the leading provider of robust critical infrastructure solutions to secure continuous power supply and data communication, has signed a strategic partnership agreement with the leading colocation data center provider, Green Mountain. The two companies intend to design and build new sustainable data centers in the Nordic market.

Green Mountain designs, builds and operates highly secure, innovative, and sustainable colocation data centers in Europe. The data centers operated by Green Mountain are renowned for their focus on energy efficiency and security with 100% uptime. Coromatic has extensive experience in the data center industry - designing, building, and servicing critical infrastructure. The two companies are leading providers in their respective competency areas in the Nordics with a long-standing collaboration within critical power. The new partnership will extend and strengthen this relationship further by focusing on designing and construction of new data centers.

"I am proud and pleased that Coromatic has been selected by Green Mountain in this partnership and I am looking forward to the opportunities the agreement will bring to the market. Together, we will power the digital growth in the Nordics with sustainable and energy-efficient data centers", says Peter Neuberg, CEO of Coromatic.

"Coromatic is the leading provider of mission-critical infrastructure in the Nordic region and has vast experience in the data center industry. We are already familiar with their capabilities regarding critical power and are excited about this new long-term partner agreement for data centers ", says Svein Atle Hagaseth, CEO Green Mountain.

The agreement was recently signed and is valid for several years. Green Mountain and Coromatic are experienced partners to large national and international companies in cloud, banking/finance, the public sector, healthcare and multiple other industries.

About Green Mountain:

Green Mountain designs, builds and operates highly secure, innovative and sustainable data centers in Norway and the UK. The data centers are powered by low-cost, 100 percent renewable power and are world-leading on energy efficiency.

The company currently operates the following data center locations: SVG1-Rennesøy near Stavanger, RJU1-Rjukan in Telemark and the OSL1-Enebakk data center about 20 km outside of Oslo. In addition, a data center in London (LON1-East) was recently established through the acquisition of an existing company. It is located in one of the most important data center hubs in the world. Furthermore, Green Mountain builds Norway's largest data center campus at Hamar and have partnered with German power company KMW to establish a new data center in the Frankfurt region.

Existing customers include large international companies within cloud, banking/finance, HPC, automotive and more.
